

## HIGH FLOW MISIBLE POLYCARBONATE POLYESTER COMPOSITION

## ABSTRACT OF THE DISCLOSURE

[0075] A high flow miscible thermoplastic resin composition is disclosed which comprises structural units derived from substituted or unsubstituted polycarbonate and substituted or unsubstituted aliphatic polyester. Also disclosed is a high flow and miscible thermoplastic resin composition that comprises of structural units derived from substituted or unsubstituted polycarbonate and substituted or unsubstituted low molecular weight aliphatic polyester. In addition the composition disclosed possess good optical and thermal properties and good flow.
